The Clemco Customized Professional Maintenance

Clemco has been building quality surface preparation, finishing, and dry stripping equipment for more than 60 years. Our focus on quality, performance, reliability, and safety means that we deliver systems that ensure efficiency and productivity every time. Keeping your system operating at peak performance can be easy for you with Clemco's Customized Maintenance Audit Program.

CMAP Services

- ◆ Scheduled Visits Based on Your Budget and Your Requirements
- ◆ Careful Efficiency Testing, Monitoring, and Inspecting of Equipment Systems
- ◆ Adjustments, Lubrication, and Calibration of Equipment
- ◆ Identification of Problem Areas and Operational Issues
- ◆ Specific Recommendations for the Right Maintenance at the Right Time
- ◆ Replacement Parts Ordering
- ◆ Administrative Assistance for Unscheduled Maintenance Jobs

Clemco industrial blast facilities are engineered to suit your application and site requirements. At start-up, Clemco technical personnel make sure the installation has been done properly, the equipment performs as intended, and the operational staff is thoroughly trained. Once we step away, it is your responsibility to keep your facility operating at peak performance. And that depends upon diligent monitoring and consistent cleaning and maintenance.

Maintenance is Key to a Successful Operation

Performing periodic maintenance is vital to minimize costs and downtime and maximize efficiency. Clemco's professional maintenance audit program supports your installation. Having a highly efficient maintenance program with thoughtful planning is the key to a successful operation. The program is customized to meet your unique needs.

Planning and Scheduling are Essential for Cost-Effective Maintenance

Our expert technicians conduct system performance audits, monitor maintenance performance, and provide comprehensive written reports. We recommend tasks that need to be performed, the priority of each, and a listing of required parts. This methodical approach helps you protect the value of your investment. What's best — you stay informed without having to be involved.

Audit — A structured Maintenance Management Program

Benefits to You and Your Operation

- ◆ Reduced Energy and Operational Costs
- ◆ Reduced Downtime
- ◆ Reduced Maintenance Emergencies
- ◆ Improved Equipment Condition/Reliability
- ◆ Improved Planning and Scheduling
- ◆ Improved Inventory and Purchase Management
- ◆ An Energized Maintenance Staff

A Customized Program to Meet Your Needs

The CMAP program matches your specific needs with Clemco's professional service capabilities. The program may be set up to monitor the Clemco equipment only, or may include additional, related facility components, such as compressed air systems.

Our representative will meet with you to discuss your needs and outline a program tailored to support your operation. Following the initial meeting, Clemco will develop a complete services list and offer a proposal. Upon approval, a firm contract will be prepared detailing our services, the proposed schedule, and the program budget.

Outsourced Monitoring and Inspection Delivers

- ◆ Trouble-free Operation
- ◆ Reliable Service on Your Schedule
- ◆ Peak Performance
- ◆ Peace of Mind

The Clemco Maintenance Audit Program will minimize your facility maintenance and repair costs. With our support, you can keep your facility in "like new" condition. Regular maintenance planning and scheduling will reduce your operating costs, eliminate unscheduled downtime, and maximize your performance and productivity. It's that simple.

Our Service List can include, but is not limited to, the following:

- ◆ Blast Machines
- ◆ Remote Controls
- ◆ Inlet and Outlet Valves
- ◆ Abrasive Cut-Off Systems
- ◆ Vibratory, Heavy Particle, and Magnetic Separators
- ◆ Rotary Airlocks
- ◆ In-floor Recovery Systems
- ◆ Media Reclaimers
- ◆ Abrasive Cleaners
- ◆ Bucket Elevators
- ◆ NIOSH-approved Supplied-air Respirators
- ◆ Carbon Monoxide Monitor/Alarm Systems
- ◆ Operator Safety Equipment
- ◆ Dust Collectors
- ◆ Fans/Exhausters
- ◆ Air Compressors
- ◆ Receiver Tanks

Clemco Industries' Quality Management System is ISO 9001:2000 certified. Clemco pressure vessels are constructed to ASME code. Clemco Apollo Supplied-air Respirators are NIOSH-approved. Clemco Industries has a full-time professional Safety Department available for consultation.
